

Ashton Bentley deliver a revolutionary all-in-one Zoom Room experience

Booth 14 – N110

Looking to equip your meeting rooms with easy-to-use and integrated professional presentation & audio-videoconferencing systems?

Creating a fully integrated experience can be difficult and time-consuming, including assembling components from several vendors for the audio-visual solution, working with building and electrical contractors, and specialist furniture suppliers to have a meeting table integrated with all the required technology, and this rarely results in an elegant setup.

Ashton Bentley have overcome these challenges by delivering a revolutionary all-in-one Zoom Room experience, built with Zoom-certified components, into Ashton Bentley's proven "complete room system" packages. This complete Zoom Room works as an integrated all-in-one system, including chairs and technology-enabled tables. As with all Ashton Bentley collaboration and meeting spaces, their Zoom Room can be assembled in hours instead of days, with no specialist skills/tools or intrusive building works.

A recently installed Ashton Bentley Zoom Room collaboration space

Key points:

- The Ashton Bentley Zoom Room experience includes all the furniture and hardware technology you need for a full meeting room experience, including tables, chairs, displays, touchscreen controller, camera, microphones, speakers, discreet power and USB charging sockets, and concealed content sharing cable retractors
- The included iPad user interface is extremely simple & intuitive to use, with the revolutionary Zoom Room experience to join/launch audio/video meetings, share your presentation, see your meetings for the day, and invite remote participants.
- Option for single, dual and triple 4K displays (55", 65" or 75") and tables ranging from 3 seats to 13 seats, with a shape optimised for videoconferencing.
- Displays can be built into the standalone chassis (no building work) or wall-mounted.
- An optional touch overlay on the main display provides whiteboarding and annotation with the Zoom Room for Touch experience.

Zoom Rooms made simple.
