

## Ashton Bentley Turning the Tables on Meeting Room Design

Launching at ISE2020 new Ashton Bentley Huddle and Collaboration tables built for purpose.

Meeting spaces are thought of as complex audio-visual systems. However, the humble meeting table is overlooked and yet is a vital element for efficient meetings.

Based on our understanding and experience of how people interact with a meeting space, we realised the table is more than just a surface to sit around. Users want to connect laptops, have microphones/touch-panels/phones correctly located, charge laptops/phones/tablets and simply operate the system. Oh, and how about seating positioned correctly to the displays and camera!

Usually we find a meeting table NOT built for purpose, often the wrong 'fit' with a rats-nest of cables everywhere – sound familiar?

Even if a table can be found that is good to sit at (and looks nice) the next step is to 'force' the AV technology into it. Two different disciplines (table design and technology) collide!

Ashton Bentley overcomes this by providing a holistic approach with purpose designed ergonomic tables that integrate seamlessly with our professional display solutions and integrated audio-visual system.

A comprehensive array of table shapes and sizes deliver the best experience for video/audio calls and dynamic multi-media presentations.

With integrated, concealed power/data ports, table-boxes with retractable cables covering all the usual video inputs including USB-C for both video and laptop charging. Yet avoiding table clutter.

Available in a selection of standard surface finishes and customisable to match any interior design along with bespoke table shapes.

**LOCATION** Booth 14-N100 Integrated Systems Europe RAI Amsterdam Feb 11-14 2020
