## **Wisdom Audio to Demonstrate New Power Amplifiers at ISE 2020**

### ***SA-8 and SA-8 DSP high power 8-channel amplifiers for Theater and Multiroom Installations***

**CARSON CITY, Nev. — January 14th, 2020** — [Wisdom Audio](#), designer and manufacturer of high performance entertainment solutions tailored for the most discerning audiophiles, will demonstrate their new SA-8 and SA-8 DSP multi-channel power amplifiers for attendees of ISE 2020 in Amsterdam, Hall 5 Booth 5-T110.

Designed and built in the USA, the SA-8 and SA-8 DSP are compact 2U amplifiers that deliver 8-channels of high-performance amplification at 200 watts RMS per channel into 8 Ohms and 400 Watts per channel into 4 Ohms, all channels driven. Additionally, the channels can be bridged for even higher performance, delivering up to 600 watts into a 4 Ohm load.

“These high efficiency multi-channel amplifiers are the perfect addition to our existing powerhouse SA-X amplifier range” said Luc Guillaume, managing director, Wisdom Audio. “The SA-8 and SA-8 DSP deliver pristine audio, achieving high current delivery in a no-fan design which is flat stackable. Both models boast 8 Balanced XLR inputs for low noise connectivity and include rack ears as standard. Stable down to 2 Ohms, these amplifiers feature our unique solid aluminum “Wave” front panel matching the existing amplifier range. We’re delighted to have these amplifiers make their ISE 2020 debut.”

The SA-8 DSP model adds a DSP board enabling all 8 channels to provide the necessary digital active crossover and digital EQ profiles for all Wisdom Audio loudspeakers.

### **About Wisdom Audio**

Wisdom Audio provides high-performance entertainment solutions with a focus on technology and design. Founded in 1996, Wisdom Audio is privileged to work with leading custom integrators, architects, interior designers and engineers from around the world on some of the most challenging and beautiful homes and super yachts across the globe to deliver a truly unforgettable entertainment experience to clients.

Wisdom Audio designs, engineers and manufactures a wide range of loudspeaker systems incorporating advanced thin-film planar magnetic technologies. Its portfolio features in-wall, in-ceiling, on-wall and in-room architectural solutions as well as high-performance dedicated home theaters. Many of the company's products can be tailored and made to order in custom sizes and custom colors. With great attention to detail and respect of lead time, all of Wisdom Audio's products are designed, engineered and manufactured in the U.S.

Wisdom Audio systems combine clarity, dynamic and precision to achieve the ultimate in music and film sound reproduction. The company has earned accolades from the specialized media while satisfying a growing base of customers and dealers worldwide.
