Wisdom Audio to Introduce Architecture-Friendly, High-Resolution In-Ceiling Loudspeakers at ISE 2020

Introducing the first “High-End” minimal appearance Sub-Satellite In-Ceiling solutions to match 3 and 4-inch recessed lighting fixtures

CARSON CITY, Nev. — January 14th, 2020 — [Wisdom Audio](#), designer and manufacturer of loudspeaker systems tailored for the most discerning audiophiles, today announced the first small aperture in-ceiling loudspeaker as part of its high-fidelity, high-resolution loudspeaker series. Targeting high-performance audio applications where architectural design aesthetics can't be compromised, the Sage Series ICS3 and Sub1 in-ceiling loudspeaker system seamlessly blends into the environment, providing a high-resolution stereo audio in a living space, a media room or kitchen. Wisdom Audio will showcase their new in-ceiling speakers Hall 5 Booth 5-T110, at ISE in Amsterdam.

“With the introduction of our minimal appearance speakers, our reputation for providing superior audio within home is unparalleled,” said Luc Guillaume, managing director for Wisdom Audio. “Now we’re answering the need for a high-performance, architecture-friendly audio solution that matches 3” and 4” recessed lighting fixtures, making this product a natural fit for high-end media or living rooms.”

Behind the high-performance sound of the new ICS3 in-ceiling speaker is a Wisdom Audio developed brand new Spiral Planar Magnetic Driver, bringing our signature sound in an all new way to your client's home. This engineering breakthrough spiral PMD plays from 20kHz down to 900Hz, the widest frequency range in this market segment, before crossing over to the mid-woofer. This PMD offers super-wide dispersion that allows the sound energy to be evenly distributed throughout the listening space. Delivering incredible imaging and superior bass reproduction down to 35Hz, this speaker system offers discerning listeners a new reference in ultimate quality hidden audio speaker solutions.

About Wisdom

Wisdom Audio provides high performance entertainment solutions with a focus on technology and design.

Founded in 1996, Wisdom Audio designs, engineers and manufactures a wide range of loudspeaker systems incorporating advanced thin-film planar magnetic technologies. Our portfolio features in-wall, in-ceiling, on-wall and in-room architectural solutions as well as high performance dedicated home theaters. Many of our solutions can be tailored and made to order in custom sizes and custom colors. With great attention to detail and respect of lead-time, all our products are designed, engineered and manufactured in the US.

Wisdom Audio systems combine clarity, dynamic range and precision to achieve the ultimate in music and film sound reproduction. The company has earned accolades from specialized media while satisfying a growing base of customers and dealers worldwide.
