

LILIN announce new 'Mini-PTZ'

LILIN introduces their new 'mini-PTZ' camera, the PZD6422X3. Housed in the same 3" dome chassis as their range of varifocal mini domes, the PZD6422X3 is capable of 270 degree rotation and features a 3x optical zoom. This 'mini-PTZ' has 256 programmable preset positions and full PTZ control via the LILIN Viewer App, web browser and control systems. With built in IVS features including Tripwire and auto-tracking, and smaller than the traditional smartphone, the PZD6422X3 offers a discrete PTZ solution.

Other features include:

- 3.35-10.05mm lens
- 1080P CMOS
- Smart H.264 supported
- HDR function
- 3D Noise Reduction
- IP66/IK10 rated for external use
- Multiple bracketry options.

In keeping with LILIN's ISO 14001:2015 certification and environmentally friendly policies, the PZD6422X3 also marks the introduction of providing QR codes to download installation manuals instead of printed copies and CDs. Viewing this with a smartphone camera will bring installers to the interactive manual.
