DSPECIALISTS product family HARVEY® on further development course

The product business of DSPECIALISTS is extended by the presentation of another variant of the audio and media control matrix "HARVEY AMP" and the new configuration software HYPERMATRIX®

Berlin, 07.01.2019 - Following the successful introduction of the new HARVEY® generation last year, DSPECIALISTS GmbH, the provider of development services and products for digital audio signal processing, will focus in 2019 on the further development and expansion of the HARVEY® product family with new features and components.

In the new variant of the audio and media control matrix "HARVEY AMP", HARVEY has a 4/8/12-channel Class D amplifier unit and is capable of driving up to 16 passive loudspeakers directly with a total of 80 watts (RMS). The target markets for the new device in a compact 1U housing are multi-room projects, multi-channel audio installations and conference rooms.

HARVEY AMP will be presented at the ISE 2019 (booth 14-K170) in Amsterdam.

Another innovation at ISE 2019 is the HYPERMATRIX® configuration software.

HYPERMATRIX® makes it possible to configure several HARVEY® devices as if they were a single device. Several HARVEYs can be installed centrally in a 19-inch rack or distributed over a large area. HYPERMATRIX® always ensures simple configuration and correct latency control on all channels.

Finally, the HARVEY Remote RC4 will also be presented in further versions. In addition to the European version for 60 mm flush-mounted boxes, the counterpart for American switch frames with a noble metal surface is now also available. The IP-based RC4 remote control is freely programmable and makes it possible to call up presets or to set audio levels.

ISE visitors will be able to see how easy it is to configure HARVEY® for various applications and how convenient it is to set up a project for a complex task within a few minutes.

The main advantages of HARVEY® are first class audio quality, easy configuration and the ability to control not only audio but also media devices and lighting.

ABOUT DSPECIALISTS:

DSPECIALISTS Digitale Audio- und Messsysteme GmbH was founded in 2003 with its headquarter in Berlin. The company is specialized in the development and sale of products for digital audio signal processing and measurement technology. In addition to numerous customer-specific projects, DSPECIALISTS develops and markets its own product family HARVEY®, a flexible audio and media control matrix that is available in various versions.
