

Outdoor Solutions for Smart Cities

After Famasete being awarded with the main prize of the “Iberian Business Awards 2018” and acquiring the status of Best Interactive Systems Manufacturer in Portugal, the company now presents a new range of products: the Wingsys QX003 interactive outdoor kiosk.

This solution developed especially for outdoor environments, can be installed in any city in the world. The i-Content's multi-touch software allows the customer to dynamically and remotely update content, providing all the information about the city, 24 hours a day, for the users. Videos, images, brochures, websites, main contacts, the limit is your imagination... The software can transmit the most varied tourist information, such as the main hotels and restaurants, museums, near hospitals and pharmacies, culture and others, that can be downloaded to users' smartphones.

These and many other solutions can be seen at ISE 2019 on stand 8-G357, Amsterdam - NL, or at the website www.wingsys.com.
