

Between QSR & Queue Management Solutions

Every year, Famasete surprises us with something new and irreverent. This year was no exception. Through the internationally recognized brand Wingsys, the Portuguese company launches a new line of interactive fast and efficient virtual payment solutions that can be applied in a wide variety of areas.

The company presents a family of multi-touch kiosks (indoor and outdoor) that allow the consumer to make simple and quick reservations and purchase a product avoiding long queues. Also permit the seller or chain of restaurants to improve the service of attendance to the public through innovative systems that promote the brand. These stand up Wingsys QX003PS kiosks can contemplate different touchscreen displays, ticket printer, 1D and 2D bar code scanner, high frequency smart card reader and payment pinpad, among other solutions.

These and many other solutions can be seen at ISE 2019 on stand 8-G357, Amsterdam - NL, or at the website www.wingsys.com.
