Origin Acoustics New Marquee Home Theater Collection – A Labor of Love

ISE 2019 – Amsterdam, RAI, NL (January 29, 2019) –Origin Acoustics, a leading manufacturer of architectural loudspeakers and custom installed audio is proud to introduce the **Marquee Collection** at CEDIA Expo 2018, Exhibit #3042, at ISE Integrated Systems Europe, 5-8 February 2019, Stand 5-U90.

The Marquee Collection – The definition of high performance, Marquee features several models to address various theater configurations.

The Marquee front channel LCR's boast a driver configuration with dual 8-inch woofers, dual 5-inch midrange drivers and a single compression driver. The drivers are mounted in a steel baffle attached to a sealed, extruded aluminum enclosure. The enclosure can mount in or on the wall depending on the homeowner's preference. Various grille options, from slatted wood to a more conventional perforated metal, are available. A smaller version of the LCR's with dual 5-inch woofers and a compression driver in a ported, extruded aluminum enclosure serve well for smaller theaters or as side and rear surround speakers.

On-wall

For Atmos® height channels and/or dedicated surround channels, the Marquee in-ceiling speakers blend perfectly with their front channel counterparts. They feature a high-output, 10-inch, treated paper woofer with a three-inch, midrange and a 1-inch titanium dome tweeter. Timbre matched to the front channels, the Marquee in-ceiling speakers provide addition flexibility in system design.

A 15-inch professional woofer in a substantial ported enclosure, the Marquee subwoofers are

intended to be used in pairs. Each woofer is powered by the new SUBA1000 DSP amplifier with a single channel of 1000 watts and all the digital signal processing necessary to tune each sub for optimum performance.

“Developing Marquee has been a labor of love,” said Mike Hopkins, Origin’s Director of Product Development. “Every one of our engineers has enjoyed the freedom of crafting the finest loudspeakers we have ever created. Exotic drivers, unique enclosures and premium parts throughout have resulted in a system that is incredibly impressive.”

About Origin Acoustics – www.originacoustics.com

The Origin team has been responsible for inventions and innovations that have changed the face of the home entertainment industry. Inventions like the first in-wall speaker and the first aimable in-ceiling speaker are just the tip of the iceberg. Pushing the limits of technology and materials, this team has dominated the market for three decades and supplied loudspeakers to literally millions of homes around the world.

Today they have joined forces under the Origin banner to deliver the most advanced and impressive array of architectural loudspeakers ever available. With over 100 years of combined experience in the industry, they are dedicated to enhancing the lives of every person who chooses to install Origin loudspeakers in their home.
