Origin Acoustics New Performance Subwoofer Collection Presented at ISE 2020

Las Vegas, NV, USA –February 3, 2020 Origin Acoustics, the leading manufacturer of architectural audio, announces its new Performance Subwoofers with the release of three new models of flood standing powered subwoofers.

The new collection features coated paper woofers, high-powered digital amplifiers, and a lightly textured and brushed finish, the Performance Subwoofer Collection from Origin Acoustics exceeds our previous builder-focused models in all facets.

These new subwoofers deliver more volume, lower frequencies, an attractive aesthetic, and it all sits in a smaller cabinet. This collection benefits from an additional down-firing passive radiator, which provides extended bass frequencies and volume with no extra power consumption.

Available in 8, 10, and 12" configurations, these models will be available from Origin Acoustics in March of 2020.

About Origin Acoustics – www.originacoustics.com

The Origin team has been responsible for inventions and innovations that have changed the face of the home entertainment industry. Inventions like the first in-wall speaker and the first aimable in-ceiling speaker are just the tip of the iceberg. Pushing the limits of technology and materials, this team has dominated the market for three decades and supplied loudspeakers to literally millions of homes around the world.

Today they have joined forces under the Origin banner to deliver the most advanced and impressive array of architectural loudspeakers ever available. With over 100 years of combined experience in the industry, they are dedicated to enhancing the lives of every person who chooses to install Origin loudspeakers in their home.
