

## Ecler will simply amaze you at ISE 2019 with its new AV Experience

Professional audio solutions will feature a Dante™ matrix, able to spread audio routing over IP (Ethernet networks) with no wiring boundaries and distance limits, simplifying the deployment of installed systems, no matter how big or complex they are. Equipped with 32 Dante™ inputs/outputs and 8 ANALOGUE inputs/outputs channels, **MIMO4040DN** offers a whole range of audio management solutions including control and Dante™ audio accessories to reach its full potential.

Newest accessories designed for digital remote control include wall panels equipped with Ethernet interface: **WPNET4KV**, **WPNET8K** and **WPNETEX**. Regarding graphical control devices, two new references will be presented: **WPNETTOUCH** (10" capacitive touch screen fully compatible with **EclerNet Manager** Software for UCP management) and **PAGNETDN** (a new digital paging console with gooseneck microphone and Dante™ audio transport, together with UCP management capabilities). All these accessories will match perfectly with the new **MIMO4040DN** matrix, using audio over IP and Ethernet control technologies.

**Ecler** 2019 software solutions will feature **RePLAYER** app, running in Android® / iOS® smart devices, which behaves as an end user remote control for the audio content played in the **ePLAYER1** streaming players. On the other hand, **Ecler GALLERY** is an Internet online platform to manage Ecler media players' installed worldwide.

As a part of a constant innovation process, full AV integration becomes crucial nowadays. Acknowledging this, **Ecler** expands its catalogue introducing two new product divisions: **Ecler ACOUSTICS** and **Ecler VIDEO SYSTEMS**, offering Acoustic treatment and video signal management products correspondingly, thus being able to provide a global Sound and Video enhanced experience.

Ecler would like to invite you to **stand 7-H190** to get a better overview of these releases.
